

Tariff Resiliency: Agile Solutions for Uncertain Times

In today's fast-changing trade environment, shifting tariffs and supply chain disruptions create uncertainty. **A proactive strategy** isn't only beneficial, it's essential. At DSM, we understand that **timing, agility, and cost control are critical**. We also know that every manufacturing situation is unique. Our team of experts delivers clear, tailored insights, empowering you to make **strategic decisions in real time**.

Whether you are reassessing your production strategy or exploring North American manufacturing, **we are here to guide you with precision and expertise**. Let's start the conversation!

SUPPLY CHAIN AGILITY

Tariff changes can drive up costs, delay timelines, and impact product quality. With the right approach, your supply chain stays strong. DSM delivers the assurance you need with risk mitigation, flexible sourcing, and deep industry experience. Our agile approach ensures you maintain efficiency and rigorous quality standards.

EXPERTISE AND COMPLIANCE

With 25 years in the industry, DSM delivers quality, precision, and reliability. We are ISO 9001:2015 certified, with teams trained to IPC-A-610 and J-STD-001 for strict compliance with industry standards. We provide advanced inspection technology, including SPI, 3D AOI, and 3D X-ray, guaranteeing accuracy. Secure, internet-based functional testing provides real-time visibility, ensuring seamless product performance.

TWO LOCATIONS, SUPERIOR FLEXIBILITY

With facilities in both Canada and the U.S., DSM supports you in optimizing production, control costs, and minimizing tariff impact. Our dual-location model ensures seamless operations, allowing you to adapt quickly and maintain efficiency. No matter how trade dynamics shift, DSM delivers the strategic advance you need to stay competitive.
